ENVIRONMENT, HEALTH & SAFETY

ENVIRONMENT

F&M Plastics has a tremendous care about the environment. We want a safe and clean environment for you, your children and their children. We are committed to the efficient use of resources, preventing pollution, and reducing environmental impact of our operations and products. We will make every effort to preserve the environment, air, water, land and climate.

We are committed to:

Providing a safe and healthful workplace and ensure that all employees are properly trained for safety and for working with the correct safety equipment.

Be an environmentally responsible neighbor in the community where we operate.

Correct immediately any incidents or conditions that would endanger health, safety, or the environment.

Conserve natural resources by adopting pollution prevention practices.

Extending the life of equipment through preventive maintenance scheduling, purchasing and reworking used equipment, etc.

Develop and improve our operations and technologies to minimize waste, and other pollution, minimize health and safety risks, and dispose of waste safely and responsibly.

Ensure the responsible use of energy throughout our business, including conserving energy improving energy efficiency.

Participate in efforts to improve environmental protection and understanding.

Meet and exceed all applicable Federal and State requirements set and adhere to stringent requirements no matter where we do business.

Health & Safety

We inspire to achieve zero harm to our employees. F&M Plastics belief is that all injuries can be prevented. Responsibility starts with each one of us. As such we will consult with our employees in decisions that affect the health and safety aspects of our workplace, products and services.

Our long-term success depends on working hard to ensure the safety of our workers, our visitors, our operations, and the public. We believe that a safe and healthy workplace is a fundamental right of every person and imperative to our business.

Materials

PVC - The world's most versatile plastic, vinyl has brought safe, versatile, durable, and efficient products to people everywhere for more than 50 years. In your home and throughout your community, vinyl works hard to make your life easier every day. *(For more information look at our materials page.)*

F&M Plastics applies PVC vinyl to products to enhance their performance, comfort and to give them sharp aesthetics. PVC/Plastisol is so proficient and very cost effective. Typical applications provide a protective layer against sharp or rough materials, a protective plastic layer to prevent corrosion, or just a beautiful and soft coating to enhance the product's appearance.

Polyurethane - is everywhere. We come into contact with it in all aspects of daily life. It's in the cars we drive, the ships we sail, the houses we live in, our offices and our schools. We sleep on it, sit on it and wear it. It keeps our food fresh, protects coastlines, assists the medical industry and gives fire fighters an essential piece of safety equipment.

Because of its versatility, polyurethane is used in many industries for a variety of applications. These industries range from aerospace to agriculture, electronics to textiles, and medical to commercial. Polyurethane products are used in many different applications, and include parts like shocks, seals, gaskets, tubing, casters, plugs, impellers, isolators, and cutting surfaces.

Ethics

At F&M Plastics, we know that how we conduct ourselves and manage our business relationships is as important as the professional services we deliver. We are committed to excellence in all of these areas, because we understand that our success as a company depends equally on our integrity. Our commitment to an ethical culture at F&M starts with the personal integrity of our employees and our values and reflects our continued commitment to ethical business practices and regulatory compliance.
